

Emergency Response and Resource Coordination

Factor	Dataset Needed	Where to Request in Sri Lanka	Format	Resolution	Purpose
Ambulance Fleet Counts & Station, Hospital Locations	Ambulance fleet counts, station and hospital locations	Ministry of Health (health.gov.lk); Suwaseriya Foundation (1990 Ambulance Service); District hospital directories via Ministry of Health	Vector / tabular (point)	Facility-level	Emergency response capacity mapping and response-time estimation
Shelter / Safety Center Locations & Capacity	Registered shelter locations and capacity figures	Disaster Management Centre (dmc.gov.lk); District/Divisional Secretariat records	Vector / tabular (point, capacity attribute)	Facility-level	Evacuation planning and shelter allocation optimization
District / Divisional Administrative Boundaries	Administrative boundary layers	Survey Department (survey.gov.lk); Department of Census & Statistics (statistics.gov.lk)	Vector (polygon)	District / DS division level	Spatial aggregation unit for combining all component datasets and reporting
Relief Stock / NFI Availability Patterns	Relief stock and non-food item (NFI) inventory records	Disaster Management Centre (dmc.gov.lk); National Disaster Relief Services Centre (NDRSC)	Tabular / time-series	Warehouse / district level	Supply chain optimization and relief stock forecasting
Full Road Graph	Complete road network graph	Survey Department (survey.gov.lk); OpenStreetMap / HOT Export (export.hotosm.org)	Vector (line, network graph)	Road-segment level	Routing algorithm input (VRP/ILP) and travel-time modeling
Road / Bridge Damage Counts by District	Damage counts for roads and bridges	Road Development Authority – RDA (rda.gov.lk); Disaster Management Centre situation reports	Tabular / vector	District level	Identifies blocked or damaged routes affecting logistics planning
Flood-Blocked Road Segments (Derived)	Flood-affected road segments	Derived internally: Road graph overlaid with flood extent maps (Irrigation Department; Disaster Management Centre)	Vector (line, derived)	Road-segment level	Dynamic routing avoidance during active flood events
Road Classification (Optional)	Road class/hierarchy attributes	Survey Department (survey.gov.lk); Road Development Authority (rda.gov.lk)	Vector attribute (line)	Road-segment level	Prioritizes primary/secondary roads for routing weight
District / GN-Division Population & Age Structure (Derived)	Population counts and age structure	Department of Census & Statistics (statistics.gov.lk)	Tabular	Grama Niladhari division level	Vulnerability-weighted resource allocation (elderly/children prioritization)
Gridded Population	Gridded population estimates	WorldPop (worldpop.org); Department of Census & Statistics	Raster	100m grid	Fine-grained population distribution for demand estimation
Event-Level Disaster Records (Fatalities, Displaced, Duration)	Historical disaster event records	Disaster Management Centre – DesInventar Sri Lanka (desinventar.net, country: LKA)	Tabular	Event-level	Historical severity benchmarking and model training data
Named-Event Situation / PDNA Reports	Situation reports and Post-Disaster Needs Assessment (PDNA) documents	Disaster Management Centre situation reports; Ministry of Disaster Management / UNDP PDNA reports	PDF / document	Event-level	Qualitative validation and cross-reference for damage assessment
