24 August 2026

The Director General
Department of Agriculture
Peradeniya, Sri Lanka

Dear Sir/Madam,

Subject: Request for Soil Type Dataset Final-Year Research Project “Integrated Flood and Landslide Risk Assessment and Response System for Sri Lanka” (Project ID: J26-IT-334)

We are final-year BSc (Hons) in Information Technology undergraduates at the Sri Lanka Institute of Information Technology (SLIIT), currently conducting the above mentioned project under the supervision of Dr. Kapila Dissanayaka (Supervisor) and Mr. Uchira Wickramaratne (Co-Supervisor). The project develops an AI-driven, multi-hazard platform for landslide prediction, early-warning decision support, and emergency response coordination. As part of the Landslide Prediction Component (conducted by Bagya R.M.S., IT23394124), we require soil classification data to assess slope stability and geotechnical vulnerability.

We would be grateful for access to the Soil Type / Soil Classification Dataset maintained by the Department, as follows:

- Data requested: Soil classification/type maps (e.g., Red-Yellow Podzolic, Mountain Regosol, Alluvial, Latosols) with texture, drainage, and depth data, along with geo-referenced boundary files (Shapefile/GeoJSON), at District, DS, and GN Division levels.
- Geographic focus: Nuwara Eliya District (Ambagamuwa, Kotmale, Walapane, Kelani River and Kalu River DS Divisions), with island-wide coverage where available.
- Format: Any machine-readable GIS format (Shapefile, GeoJSON, or vector polygon layers) convenient for your team.

The data will be used strictly for academic research as a core input for landslide susceptibility modelling in accordance with SLIIT's research ethics and data privacy guidelines, and will not be shared with third parties or used commercially. We are glad to sign any data-usage agreement the Department may require.

We would be most grateful for your kind consideration, and happy to provide any further clarification needed.

Yours faithfully,

.....
Bagya R.M.S.
